

# Bundaberg 10-year Action Plan

## Option 4: Floodway house purchase scheme

During certain floods, parts of North Bundaberg are subjected to high-depth and high-velocity floodwaters, creating an extreme flood hazard for some properties. Approximately 130 properties have been identified within these flood hazard areas.

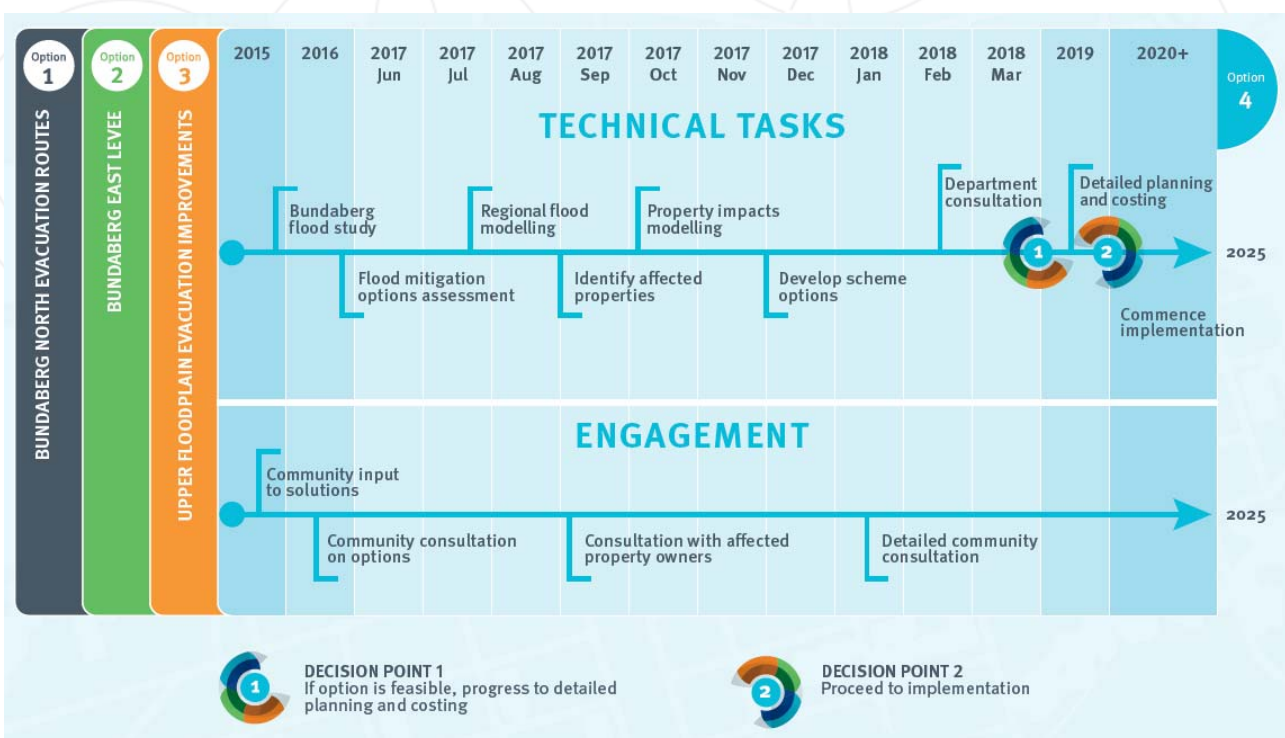

A flood purchase scheme would explore the potential for the establishment, in close collaboration with the community, of either a voluntary purchase or voluntary relocation, through a land-swap, for houses in the designated flood hazard areas of Bundaberg North.

### What are the next steps?

The next steps are to understand and characterise the flood behaviour through further flood modelling, and assess the social impacts of any possible purchase scheme. This will enable the government to assess the potential for a Floodway House Purchase Scheme and how this could work.

Any proposed scheme will be developed through close engagement with the local community.

### Indicative timeline

### How can I get involved?

There will be opportunities for ongoing involvement in the action plan.

If you have any questions, feedback or would like more information please contact us on 13 QGOV (13 74 68). If you would like to be updated on the progress of the action plan, please register your details at [bundabergactionplan@dilgp.qld.gov.au](mailto:bundabergactionplan@dilgp.qld.gov.au).
